A telegram received in Barre yesterday brought news of the settlement of the granitecutters' strike in Raymond, Cal. one of the newer and more important hard stone fields to be developed on a large scale within recent years. For a number of months, employees and the cutting plant owners have been endeavoring to reach a settlement, and meanwhile a number of large building jobs, among them a San Francisco public building, were held up. No details of the agreement were included in the telegram, although it is understood that the granite cutters obtained the concessions they had requested. I. Bruggi, who left the city to-day, is probably the first Barre granite worker to start for California. Mr. Bruggi left for Raymond to-day. The telegram received in Barre stated that work was to be resumed in that center this morning.
